(2.0.11)

$$\frac{\sin 105^\circ}{7} = \frac{\sin 45^\circ}{b} \quad (2.0.12)$$

$$\frac{\sqrt{3} + 1}{14 \cdot \sqrt{2}} = \frac{1}{b \cdot \sqrt{2}} \quad (2.0.13)$$

$$\frac{\sqrt{3} + 1}{14} = \frac{1}{b} \quad (2.0.14)$$

$$b(\sqrt{3} + 1) = 14 \quad (2.0.15)$$

$$b(2.732) = 14 \quad (2.0.16)$$

## 1 QUESTION No. 2.5

similarly,

Draw a  $\triangle ABC$  with side  $a = 7\text{cm}$ ,  $\angle B = 45^\circ$ ,  $\angle A = 105^\circ$ .

(2.0.17)

$$\frac{\sin 105^\circ}{7} = \frac{\sin 30^\circ}{c} \quad (2.0.18)$$

$$\frac{\sqrt{3} + 1}{14 \cdot \sqrt{2}} = \frac{1}{c \cdot 2} \quad (2.0.19)$$

$$c(\sqrt{3} + 1) = 7 \cdot \sqrt{2} \quad (2.0.20)$$

$$c(2.732) = 9.898 \quad (2.0.21)$$

## 2 EXPLANATION

we first need to find  $\angle C$ :

Finding  $\angle C$

In  $\triangle ABC$ ,

$$\angle A + \angle B + \angle C = 180^\circ \quad (2.0.1)$$

$$105^\circ + 45^\circ + \angle C = 180^\circ \quad (2.0.2)$$

$$150^\circ + \angle C = 180^\circ \quad (2.0.3)$$

$$\angle C = 180^\circ - 150^\circ \quad (2.0.4)$$

$$\angle C = 30^\circ \quad (2.0.5)$$

(2.0.6)

By law of sines

$$\frac{\sin A}{a} = \frac{\sin B}{b} = \frac{\sin C}{c} \quad (2.0.7)$$

$$\frac{\sin 105^\circ}{7} = \frac{\sin 45^\circ}{b} = \frac{\sin 30^\circ}{c} \quad (2.0.8)$$

(2.0.9)

(2.0.10)

Then,  $AX=B$

which can be expressed as the matrix equation

$$\begin{pmatrix} 2.732 & 0 \\ 0 & 2.732 \end{pmatrix} \begin{pmatrix} b \\ c \end{pmatrix} = \begin{pmatrix} 14 \\ 9.898 \end{pmatrix} \quad (2.0.22)$$

By solving (2.0.22), we get values :

$$\Rightarrow a = 7; \quad (2.0.23)$$

$$\Rightarrow b = 5.12; \quad (2.0.24)$$

$$\Rightarrow c = 3.62; \quad (2.0.25)$$

Now, vertices of given  $\triangle ABC$  can be written as,

$$\mathbf{A} = \begin{pmatrix} 0 \\ c \end{pmatrix} = \begin{pmatrix} 0 \\ 3.62 \end{pmatrix} \quad (2.0.26)$$

$$\mathbf{B} = \begin{pmatrix} 0 \\ 0 \end{pmatrix} \quad (2.0.27)$$

$$\mathbf{c} = \begin{pmatrix} a \\ 0 \end{pmatrix} = \begin{pmatrix} 7 \\ 0 \end{pmatrix} \quad (2.0.28)$$

Now,  $\triangle ABC$  can be plotted using vertices  $a$ ,  $b$  and  $c$   
 Plot of the angle  $\triangle ABC$  :

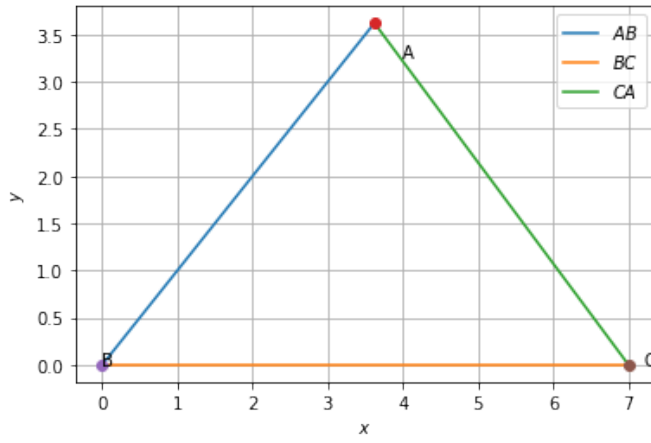

Fig. 2.1:  $\triangle ABC$
